

Sajideen Hassan

MERN Stack Developer

03348631680 | sajideenhassan12@gmail.com | Al-Hafeez Garden Phase 5,lahore

Professional Summary

Motivated MERN Stack Developer with a strong foundation in Software Engineering and hands on experience in building responsive, full stack web applications. Proficient in MongoDB, Express.js, React.js, Node.js, JavaScript, HTML5, CSS3, and MySQL. Experienced in developing user focused E commerce websites and optimizing performance using modern development practices. Passionate about creating scalable solutions while continuously enhancing technical and problem solving skills.

Technical Skills

- Frontend:** HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Bootstrap, Framer Motion
- Backend:** Node.js, Express.js, FastAPI, Flask
- Database:** MongoDB (Mongoose), MySQL, Firebase
- Authentication & Security:** JWT, RBAC, bcryptjs, OTP-based authentication
- Tools & Platforms:** Git, GitHub, VS Code, Vercel, Figma, Stripe API
- Other Technologies:** REST APIs, MVC Architecture, Agile, Responsive Design

EXPERIENCE

Development Team Lead

Nov 2025 - Present

TechTideCo.

- Leading a team of 5 developers to build scalable MERN stack applications.
- Architecting backend systems using Node.js, Express, and MongoDB.
- Conducting code reviews and maintaining GitHub repositories with clean, modular architecture.
- Ensuring responsive React frontend integration and optimized user experience.
- Managing sprint planning and Agile workflows to ensure timely project delivery.

MERN Stack Developer

Aug 2025 - Nov 2025

TechTideCo.

- Developed and maintained full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Built RESTful APIs and implemented secure authentication systems.
- Integrated frontend and backend services to ensure seamless performance.
- Optimized application performance and improved scalability.

Management Lead

July 2025 - Aug 2025

ISPR Internship

- Leading strategic communication with clarity, precision, and purpose.
- Managing public relations to build trust and a strong national image.
- Delivering timely, accurate, and impactful information to the public.
- Ensuring coordination, transparency, and professionalism at every level.

Web Developer Intern

Jan 2025 - Mar 2025

IT Club

- Completed specialized training in fake news detection and media literacy.
- Improved analytical accuracy by 25% through structured research methodologies.
- Strengthened critical thinking and professional discipline in information evaluation

EDUCATION

BS. Software Engineering Lahore Garrison University Major: Web Development Minor: Mobile Application Development	2021-2025
ICS Physics Garrison College For Boys Division: 1st	2019-2021
Matriculation Army Public School & Colleges System Subject: Computer Science	2019-2021

PROJECTS

TechTide Corporate Website - Designed and developed a responsive corporate website using MongoDB, Express.js, React, and Node.js. - Built admin dashboard with CRUD functionality for services, blogs, and contact forms. - Implemented authentication and role-based access control. - Integrated secure backend APIs and real-time form validation.	
Task Management Website - Developed full-stack system with JWT authentication and RBAC for Admin, PM, Developer, SQA, and Client roles. - Designed RESTful APIs for project tracking, attendance, and invoicing. - Implemented task workflows, priority management, and performance scoring. - Built responsive UI using React (Vite) and Tailwind CSS.	
Voice Speech Website - Built Flask-based web application for browser audio recording and speech-to-text conversion. - Implemented MediaRecorder API and WebM-to-WAV conversion. - Designed REST endpoints for transcription storage and history management.	
AuraSpeech Website - Built full-stack AI TTS web application using Python, FastAPI, and Microsoft Edge TTS. - Developed REST APIs for dynamic speech generation with customizable voice parameters. - Implemented real-time audio playback and MP3 downloads. - Optimized backend performance using Uvicorn.	
N8N Workflow Website - Developed secure full-stack platform with Node.js, Express, MongoDB, JWT authentication, and Stripe integration. - Implemented Google OAuth login and secure payment workflows. - Applied XSS protection, rate limiting, and NoSQL injection prevention.	
Inventory Management System - Developed MERN-based inventory and sales tracking system. - Implemented OTP-based authentication and role-based dashboards. - Built barcode integration, sales workflows, and analytics dashboards (Chart.js, Recharts). - Designed CRUD operations for product and staff management.
