Experience

TechTideCo. | Associate Software Engineer

Nov 2025 - Present

- Built scalable MERN stack applications with focus on performance and clean architecture.
- Developed RESTful APIs using Node.js, Express, and MongoDB for reliable backend systems.
- Created responsive React interfaces to improve user experience across devices.
- Maintained modular GitHub codebases and contributed through peer code reviews.
- Worked in Agile teams with active participation in sprint planning and delivery cycles.

TechTideCo | Software Engineer Intern

Aug 2025 - Nov 2025

- Supported development of full stack applications in a production environment.
- Built and integrated REST APIs with secure authentication flows.
- Connected frontend interfaces with backend services for smooth data handling.
- Identified and resolved performance issues to improve application efficiency.

ISPR Internship | Management Lead

July 2025 - Aug 2025

- Managed communication workflows and supported public relations operations.
- Coordinated team activities to ensure timely execution of assigned tasks.
- Assisted in organizing and distributing structured informational content.

IT Club | Web Developer Intern

Jan 2025 - Mar 2025

- Conducted research on information systems and digital literacy frameworks.
- Improved data processing efficiency through structured analysis methods.

Education

Lahore Garrison University

DHA Phase 6, Sector

C

Software Engineering

2025

CGPA: 3.0

August 2021 - June

Skills

- **Programming Languages:** JavaScript, Python, Typescript, SQL, C++
- **Libraries/Frameworks:** NestJS, ExpressJS, NextJS, React, React Native, FastAPI, Flask, uv, OpenAI, Claude, Redis, Prisma, SQL alchemy, Socket.io, bun, Framer Motion, Tailwind, Shadcn, Bootstrap
- **Tools / Platforms:** Git, Antigravity, Codex, Claude Code, VS Code, Supabase, Docker, Railway, Redis, Resend, Groq, Hugging face, n8n, Github, Github Actions, Copilot, Figma, Stripe, Vercel, Hostinger, Lovable
- **Databases:** PostgreSQL, MongoDB, MSSQL, SupabaseDB

Projects / Open-Source

Brotchun Website | Link

Next.js, React, Tailwind CSS, Animation Libraries

- Built a responsive and high-performance web application using Next.js and React.
- Focused on optimized UI/UX design with smooth interactions and fast client-side rendering.
- Implemented modern layouts and animations to improve user engagement.

AuraSpeech Platform | Link

Python, FastAPI, Microsoft Edge TTS

- Developed an AI powered text-to-speech system with customizable voice outputs.
- Built efficient backend APIs using FastAPI with optimized server performance.
- Improved response speed and audio generation quality through system tuning.

Inventory Management System | Link

MERN Stack, Chart.js, Recharts

- Designed a full stack inventory tracking system with real-time data visualization.
- Integrated secure authentication and OTP based access control.
- Implemented barcode scanning and analytics dashboards for operational efficiency.
